

DATASHEET RollUP – RL2700RX-V200

RL2700RX-V200

The optimal solution for rescue in confined spaces, heights, depths and horizontal rescues.

The patented RollUP system combines the advantages of a roll-up stretcher with the rigidity of a basket carrier.

The RL2700RX-V200 is designed for hoisting by helicopter or hoisting in caves or industrial confined spaces.

Once the patient is secured, the stretcher becomes rigid. Integrated struts prevent the stretcher from buckling and prevents pressure being exerted on the patient during the rescue.

The integrated struts can be removed before use if necessary - especially in tight spaces.

All components are designed for chemical resistance and easy cleaning (decontamination or disinfection)

For convenience, the stretcher can be rolled up and stored in an included backpack.
